recently been proposed to set positive end-expiratory pressure (PEEP) by targeting end-expiratory transpulmonary pressure. This approach, which relies on the measurement of absolute esophageal pressure ( $P_{es}$ ), has been used in supine position (SP) and has not been investigated in prone position (PP). Effects of positive end-expiratory pressure strategy in ... Severe acute respiratory syndrome (SARS) is a viral respiratory illness caused by a coronavirus called SARS-associated coronavirus (SARS-CoV). SARS was first reported in Asia in February 2003.
