Assessment Of Quality Of Life The QOL scale is scored by simply adding the score on each item. The range of scores is between 15 to 105, with a higher score or number being indicative of a higher quality of life. An average total rating for a healthy person is usually around 90, whereas a low quality of life measures around 15. 5 Quality of Life Questionnaires and Assessments Assessment of Quality of Life This article has no abstract; the first 100 words appear below.
