RPM Mode allows you to set up the fan speed when the CPU temperature is below 75°C 1. Click and drag to adjust the fan's speed. 2. Click to switch between the CPU and chassis fan screens. 1. Tick to set the ... [Motherboard] Fan Xpert 3 Introduction - Asus AI Cooling detects CPU temperatures and uses a proprietary algorithm to calculate the lowest fan speed required to effectively cool the system and keep fan noise down. Automated optimization Under stable system loads, the software then automatically lowers fan* speed to the optimal setting, decreasing fan noise without compromising performance. ASUS | AI Cooling To set a custom fan speed enter the maximum speed, and click Set Manual. If you want to set a custom auto speed click Custom Auto. Select the PCH sensor in order to get the temperature of your system for triggering the fan speed and then enter the temperature and the speed that the fan should run at when your system reaches that temperature. How to set custom fan speed on a Windows 10 PC Well, you can also change or control fan speeds manually but the process is a bit tricky. You need to connect a manual fan controller to your Windows system with knobs and this will set fans to different speeds.. So, it is best to go for the automatic option via software to control the computer's fan

speed. The automatic PC fan speed controller software monitors temperatures from numerous ... Top 10 Software to Change or Control Fan Speeds of Windows ... ASUS is a leading company driven by innovation and commitment to quality for products that include notebooks, netbooks, motherboards, graphics cards, displays, desktop PCs, servers, wireless solutions, mobile phones and networking devices.
