programmer has experienced something like this: you change a bit of code in one corner, and in a (seemingly) unrelated corner, something breaks! The bitter truth is: both new and changed code will inevitably contain bugs. Use automated tests that help you keep old code stable. Keep in mind: You can also go one step further and write tests before your actual code. Become a Better

Programmer: 5 Essential Methods at a ... Programmers do a lot of repetitive tasks. If you are a server guy, then you would end up deploying a lot of files/jars from your machine. Or if you are an App Developer, uploading App builds can be time consuming and need lots of mouse clicks. Instead, one
