living or even sporulating in a marine habitat. About 444 species of marine fungi have been described, including seven genera and ten species of basidiomycetes. Marine fungi - Wikipedia One of them is marine Oomycetes, which cause fungal diseases in marine shellfish and abalones. The diseases caused by the fungi of this group and the fungal characteristics are introduced. The pathogens include members of the genera Lagenidium, Haliphthoros, Halocrusticida, Halioticida, Atkinsiella, and Pythium. Biology of Marine Fungi | Lucia Bongiorno (auth ...
