BioPhotonics | Photonics.com Usually, the internal volume is a key design requirement, which alters the design intent. In the early days of CAD, this was a difficult task. Especially, when working with complex geometry. Now with Fusion 360, the internal volume can be calculated with one feature. The tool for the job is the Boundary Fill command. QUICK TIP: Find Internal Volume of Fusion 360 Designs ... The term biophotonics denotes a combination of biology and photonics, with photonics being the science and technology of generation, manipulation, and

detection of photons, quantum units of light. Photonics is related to electronics and photons. Photons play a central role in information technologies, such as fiber optics, the way electrons do in electronics.
