Comparative Dental

Anatomy Dentin is roughly 72% mineral, 18% organic matter (mostly collagen) and 10% water by weight. Dentin is arranged as a collection of tubules running from the pulp towards the enamel. The tubules are roughly 4 μ m in diameter near the pulp and narrow to 1 μ m near the enamel. Chapter 7: Anatomy and Physiology - Hale Veterinary Clinic Comparative anatomy is the study of body structures of different species in order to understand the adaptive changes they have undergone in the course of evolution. Comparative Dental Anatomy deals with comparative study of morphology of teeth and

their related structures in different animals and also between members of the same species. Comparative dental anatomy: Evolution and comparison of ...
