Application of digital human modeling and simulation for vision analysis of pilots in a jet aircraft: a case study Ergonomic evaluation of visual demands becomes crucial for the operators/users when rapid decision making is needed under extreme time constraint like navigation task of jet aircraft. Application of digital human modeling and simulation for ... Three-dimensional manikins are also known as Digital Human Models (DHM). These are software representations of humans that enable designers to visualize the effectiveness of a design before a physical prototype is constructed. Design Tools: Digital Human Models Guidelines | The OPEN ... Sculptris is a digital sculpting application similar to ZBrush or Mudbox, but with an easier learning curve. Because Sculptris uses dynamic tessellation, it is essentially geometry-independent, meaning it is an ideal learning package for someone with few or no modeling skills who wants to try his hand at sculpting.
