transformation. Enterprise Cloud Computing by Shroff, Gautam (ebook) Cloud computing is an important trend that includes several categories of service, all offered on demand over the Internet in a pay-as-you-go model. Software as a service (SaaS) is one of these categories; others include platform as a service (PaaS) and infrastructure as a service (IaaS). Architecting Software as a Service for the Enterprise A centralized business technology based on cloud architecture is a one-time investment that shall enable everyone to get on the same platform. As a result, IT would not need to install new programs and configure lengthy settings for each business unit. The resource acquisition and release can be dynamically and cleverly managed.
