ourselves, but also has signed annual cooperation agreements with many large factories, multiple production lines, one-stop production of grey fabric, dyeing and printing to ensure quality and delivery. Hebei Hanlin Textile Co., Ltd. - tr suit fabric, rayon fabric A dyeing or printing process is complicated, since it involves fibre kinds, yarn or fabric structures, dyes and chemical auxiliaries, as well as dyeing technology. In order to achieve the required dyeing or printing quality, all factors that may influence the dyeing or printing process must be precisely controlled (Table 13.2). Table 13.1. Dyeing Process - an overview | ScienceDirect Topics Dyeing and printing are different applications; in printing, color is applied to a

localized area with desired patterns. In dyeing, it is applied to the entire textile. The primary source of dye, historically, has been nature, with the dyes being extracted from animals or plants. Since the mid-19th century, however, humans have produced artificial dyes to achieve a broader range of colors and to render the dyes more stable to washing and general use. Dyeing - Wikipedia PGupta0919 is a writer with special expertise in textiles, fabrics, printing, and dyeing. What Is Textile Dyeing? Textile dyeing is the process of application of color evenly on the textile (fiber, yarn, fabric, or even garment). Depending on the requirement, textile dyeing can take place in any stage of manufacturing of the

textile.
