ScienceDirect Topics Each of the main components of the RFC model (fuel cell, electrolyzer, metal hydride tank, radiator) is simulated using a dynamic, first principles approach. The environments within any control volume of the models are assumed to comprise ideal, “perfectly stirred” conditions for fluids and homogenous compositions for solids. Dynamic first principles model of a complete reversible ... 2 The standard discrete system and origins of the finite element method can be made much more effectively by considering that small portions or ‘elements’ in a continuum behave in a simplified manner. It is from the engineering ‘direct analogy’ view that the term ‘finite element’ was born. The standard discrete system and
