While UI handles the look of a digital product, UX handles how all of the UI elements work together to create a seamless user experience. A UX/UI designer combines these two areas by carrying out user

research first, and then implementing the findings in the visual design in the form of mockups, wireframes, and prototypes. These are then tested, and user feedback is gathered to inform further changes and bring the product to the greatest possible shape before the launch. What is UX/UI design?
