Start studying Anatomy & Physiology, Chapter 5: Integumentary System. Learn vocabulary, terms, and more with flashcards, games, and other study tools. Anatomy & Physiology, Chapter 5: Integumentary System Study Flashcards On Chapter 3 Medical Terminology Integumentary System Study Guide at Cram.com. Quickly memorize the terms, phrases and much more. Cram.com makes it easy to get the grade you want! Chapter 3 Medical

Terminology Integumentary System Study Guide Skin, or the integumentary system, is a great place to begin a tour through the human body systems. There are a lot of connections that can be made between this unit and the histology and cells units. The vocabulary and number of structures in this unit is not as overwhelming as some of the later body systems. The Integumentary System: Teaching Resources ... The integumentary system refers to the skin and its accessory structures, and it is responsible for much more than simply lending to your outward appearance. In the adult human body, the skin makes up about 16 percent of body weight and covers an area of 1.5 to 2 m². In fact, the skin and accessory structures are the

largest organ system in the human body. As such, the skin protects your inner organs and it is in need of daily care and protection to maintain its health. The Integumentary System | Anatomy and Physiology I

- The integument system consists of the skin (cutaneous membrane) and its accessory organs.
- The skin is composed of three layers of tissue: the outer epidermis (made of stratified squamous epithelium), the middle dermis (made of fibrous connective tissue), and the inner subcutaneous layer or hypodermis (made of adipose tissue and loose
