programming and interfacing next it is not directly done, you could admit even more in the region of this life, in relation to the world. Microprocessor 8085 Architecture Programming And Interfacing As the name suggests it controls the interrupts during a process. When a microprocessor is executing a main program and whenever an interrupt occurs, the microprocessor shifts the control from the main program to process the incoming request. After the request is completed, the control goes back to the main program.
