... Contacts correct the same refractive conditions eyeglasses correct: myopia (nearsightedness), hyperopia (farsightedness) and astigmatism (an oval rather than round-shaped cornea). Contact lenses can be made from a number of different plastics. The main distinction among them is whether they are hard or soft. Contact Lenses - Geneva Eye Clinic 3/6/2014 2

Spectacle magnification • Axial myopia = spec >> cl
• Axial hyperopia = spec >> cl • Refractive myopia << spec < cl
• Refractive hyperopia >> spec > cl

Unencumbered field of view • CL closer to eye's entrance pupil. • High ametropia: improved VF with CL

a Second Edition. This unique resource boils down... Last-Minute Optics: A Concise Review of Optics, Refraction ... may use glasses or contact lenses. Refractive surgery 33 Astigmatism. Light rays aren't refracted uniformly in all meridians due to non-spherical shape of cornea or lens, parallel rays passing through these different planes are brought to different points of focus. The cause of astigmatism is unknown. It is usually present from birth, and often occurs. Wikibooks is a useful resource if you're curious about a subject, but you couldn't reference it in academic work. It's also worth noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors.
