Company::Product Literature English Patterson Fire Pump Selection Software: When starting a fire pump design, the most important item to consider is the water supply and required pressure. Patterson fire pump selection program is designed especially for selection the fire pump required without looking up about the pump size in selection catalogs. Download Patterson Fire Pump Selection program Fire-pumps have low NPSH-curves to avoid cavitation, causing decreasing flow and pressure. The NPSH curves are often measured up to 16 mtr. in order to decide the required power – but varies according to the different fire pump standards.
