... SOLUTION: We want to find the probability of the events $E_1 = A \cap B \cap C^c$, $E_2 = A \cap C \cap B^c$, and $E_3 = B \cap C \cap A^c$. Each of these events E_i represents exactly two of A, B, or C occurring. Note that these events have no

SpringerLink Professor Pitman's text was my introduction to probability, and an excellent one at that. The prose is clear and classic probability problems are used as examples and homework problems. The diagrams are modern and instructional, and the book is very well edited. I recommend this book to those interested in learning the basics of probability. The split between “free public
domain ebooks” and “free original
ebooks” is surprisingly even. A big
chunk of the public domain titles
are short stories and a lot of the
original titles are fanfiction. Still, if
you do a bit of digging around,
you’ll find some interesting stories.
