About Production Enhancement: Unconventional fracturing, acidizing services Conventional stimulation and fracturing services Pinnacle Microseismic and Fiber Optic services Offshore vessel services Acidizing materials and services Sand control materials and services Conformance (water control) materials and services Gas (CO₂). Halliburton Production Enhancement Acidizing is one of the oldest techniques in good stimulation processes still being used today. Acids play a key role in

boosting production or increasing injectivity in oil and gas fields. Modern acid stimulation systems can be controlled and targeted to achieve specific aims for the asset team. Top Select > Services & Products > Production Enhancement ... Stimulation of oil, gas, and injection wells with acid is almost as old as the petroleum engineering industry itself. But, the science and technology of acidizing has undergone striking changes in recent years. SPE's latest book, Acid Stimulation, ensures a comprehensive and up-to-the-minute presentation by including an author team of 19 subject matter experts, all at the forefront of the development of acidizing technology. Acid Stimulation (eBooks) In sandstone formations, the acid reacts with the soluble substances in the formation matrix to enlarge the pore spaces. In carbonate formations, the acid dissolves the entire formation matrix. In each case, the matrix acidizing treatment improves the formation permeability to enable enhanced production of reservoir fluids.
