Special Effects In Film And Special effects, Artificial visual or mechanical effects introduced into a movie or television show. The earliest special effects were created through special camera lenses or through tricks such as projecting a moving background behind the actors. Greater flexibility came with the development of the optical printer, which made it possible to combine separate pieces of film and replace part of an image, thus allowing for effects such as characters flying through the air. Special effects | theatrical production | Britannica Optical effects came slightly later, using film, light, shadow, lenses and/or chemical processes to produce the

film effects. Film titles, fades, dissolves, wipes, blow ups, skip frames, bluescreen, compositing, double exposures, and zooms/pans are examples of various optical effects. Visual and Special Effects Film Milestones Larry Cohen's "Special Effects" is an average snuff-themed horror film. Eric Bogosian plays here an on-the-decline director who murders a starlet (brilliant Zoe Tamerlis, who sadly died in 1999) on camera and decides to use a dead ringer to make a film about the killing. "Special Effects" is average - the script is mediocre and the action is dull at times. Still the snuff/murder scene (the strangling) is pretty nasty! The ending is also effective. All in all I'd recommend this film for
