Pervasive computing aims at interaction with digital information by manipulating physical real world artefacts as "graspable interfaces", by simultaneously involving all human senses, and by considering interaction related to the semantics of the situation in which it occurs. Gestural interaction in the pervasive computing landscape Drawing on examples of ongoing pervasive computing projects, implicit computing procedures are explored in relation to the mediation of everyday urban life. Literatures from computing science and geographical theory are brought into conversation in order to examine the consequences of a convergence between implicit pervasive technologies and ...
