The Visible Human Project is a critical investigation of the spectacular, three-dimensional recordings of real human bodies - dissected, photographed and converted into visual data files - made by the US National Library of Medicine in Baltimore. The Visible Human Project : informatic bodies and ... The Visible Human Project is an effort to create a detailed data set of cross-sectional photographs of the human body, in order to facilitate anatomy visualization applications. It is used as a tool for the progression of medical findings, in which these findings link anatomy to its audiences. A male and a female cadaver were cut into thin slices which were then photographed and digitized. The project is run by the U.S. National Library

Posthuman Medicine

of Medicine under the direction of Michael J. Ackerman. Pla Visible Human Project - Wikipedia The Visible Human Project. Overview. The NLM Visible Human Project has created publicly-available complete, anatomically detailed, three-dimensional representations of a human male body and a human female body. Specifically, the VHP provides a public-domain library of cross-sectional cryosection, CT, and MRI images obtained from one male cadaver and one female cadaver. The National Library of Medicine's Visible Human Project The visible human project : informatic bodies and posthuman medicine. [Cathy Waldby] -- The Visible Human Project examines how the VHP provides visual access to every organ of the body, viewable from every angle and capable of being manipulated to simulate living processes like ...
