Animals Virus Diseases of Food

Animals by E. Gibbs, 1981,

Academic Press edition, in

English Virus diseases of food

animals (1981 edition) | Open

Library Foot-and-mouth disease

(FMD) or hoof-and-mouth disease

(HMD) is an infectious and

sometimes fatal viral disease that

affects cloven-hoofed animals,

including domestic and wild bovids.

The virus causes a high fever

lasting two to six days, followed by

blisters inside the mouth and on the

feet that may rupture and cause

lameness. Foot-and-mouth disease -

Wikipedia There are at least 48

important diseases people get from

the bite of bugs that bit an infected

animal. And there are at least 42 important diseases that people get by ingesting or handling food or... Diseases From Animals: A Primer Researchers have identified more than 250 foodborne diseases. Most of them are infections, caused by a variety of bacteria, viruses, and parasites.; Harmful toxins and chemicals also can contaminate foods and cause foodborne illness. Foodborne Germs and Illnesses | CDC Examples of modern diseases transmitted by animals include salmonellosis, influenza, and the Ebola virus disease. Most diseases that affect the humans originated from animals. However, diseases that directly involve animal to human transmission are regarded as a direct zoonosis an example of such is rabies. Diseases
