of sensors and processors to different parts of the body is not the ideal solution. What is needed is a meta-wearable. That meta-wearable is textiles. 3.1.

Attributes of the Textile Meta-Wearable. A textile is a meta-wearable because it meets all the attributes of the wearables in Figure 4. Wearables: Fundamentals, Advancements, and a Roadmap for ... This chapter addresses the influence of a wearable system on the wearer's emotional and social comfort: the "social wearability" of the system. Social wearability influences system performance and user decisions to adopt or reject a wearable system in much the same way as other aspects of wearability like physical comfort or usability.
